Program Bulletin 01

The following amendments apply to the CHBA Net Zero Home Labelling Program - Version 1.1. **The Program Version 1.1 update will launch on February 1, 2020.**

As a result of participant comments in the Version 1.1 webinar, two amendments have been made to the following documents within the Project Registration Workbook:

1. Tab 6: Verification Checklist
2. Tab 3: Photovoltaic (PV) Commissioning Report

Summary of Program Amendments:

1. The "Verification Checklist" will now include three separate check-boxes: "Builder", "EA", "N/A". It is expected that one check-box be selected per line item.
2. It is not a requirement for Net Zero Homes installing PV to complete either of the PV Ready Checklists. Net Zero Homes installing PV must only complete the "Photovoltaic (PV) System Commissioning Report" which is Tab 3 of the Project Registration Workbook.

The changes have been made in all program requirements documents. Please see the updated documents on the CHBA Net Zero Home Labelling Program - [Program Requirements Web Page](#).

Service Organizations: The updated documents are now available in the [SO Portal](#). Please forward this bulletin to any individuals (EA's, Builders, Trainers) who are in the process of pursuing Net Zero qualification. Before forwarding please delete the "Universal Unsubscribe" button below so that you won't be mistakenly unsubscribed by someone else.

These amendments are effective immediately and do not change any of the previously issued grandfathering periods. If you have questions please contact Brett Cass at brett.cass@chba.ca.
